Picture Guides — Step by Step

Hi, I'm Aiden. These are the same picture guides from the website, ready to print and keep by your favorite chair, or share with a friend. Every guide shows each step in order, with a red circle showing exactly where to tap.

Take your time, and don't hesitate to reach out if you get stuck.

What's Inside

1. Make a Video Call
2. Send a Text Message
3. Check & Reply to Email
4. Add a New Contact
5. Share a Photo
6. Back Up Your Photos
7. Make Text Bigger
8. Connect to Wi-Fi
9. Create a Strong Password
10. Spot a Scam Text
11. Take a Screenshot and Share It
12. Share a Link in a Text or Email
13. Adjust Brightness and Sound
14. Adjust Notifications

1. Make a Video Call

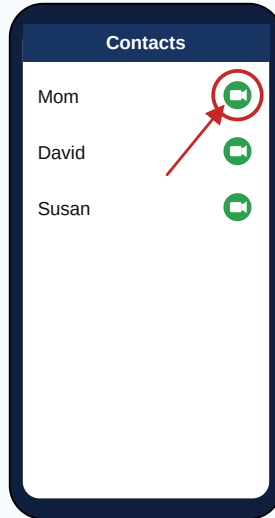

See and talk face-to-face with the people you love.

Step 1 of 3

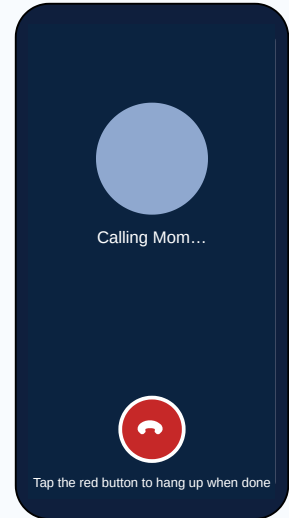

Swipe down or tap the search icon on your device, then type "FaceTime" and tap the result to open it. Searching works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 3

Find the person you want to talk to in your list, then tap the green video-camera icon next to their name.

Step 3 of 3

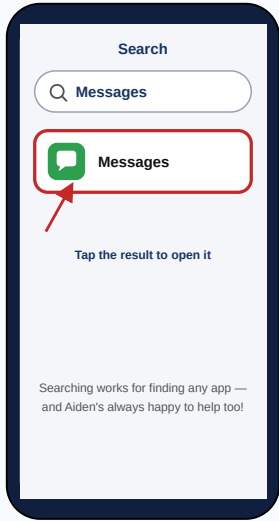

Your call will connect and you'll see their face on your screen. When you're ready to say goodbye, tap the red button to hang up.

2. Send a Text Message

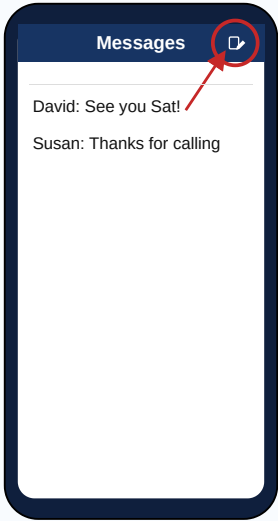

A quick way to say hello without picking up the phone.

Step 1 of 3

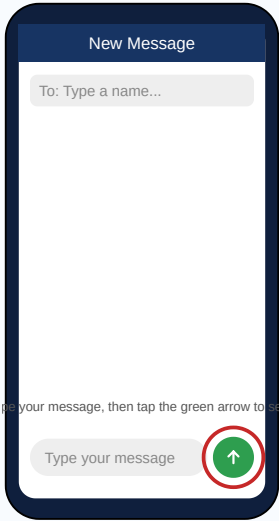

Swipe down or tap the search icon, then type "Messages" and tap the result to open it. This trick works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 3

Tap the compose icon in the top corner to start a brand new message.

Step 3 of 3

Type the person's name at the top, then type your message at the bottom and tap the green arrow to send it.

3. Check & Reply to Email

Read messages from friends and family, and write back.

Step 1 of 3

Search

Q Mail

Mail

Tap the result to open it

Swipe down or tap the search icon, then type "Mail" and tap the result to see your messages. Searching works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 3

Inbox

Susan Miller

Photos from the reunion!

Tap this email to open it

David Lee

Call me when you can

Tap on an email in your list to open and read it.

Step 3 of 3

Photos from the reunion!

From: Susan Miller

So good to see everyone — here are the pictures I took!

Tap the reply arrow to write back

Read the message, then tap the reply arrow at the bottom to write back.

4. Add a New Contact

Save someone's number so you can reach them anytime.

Step 1 of 3

Search

Contacts

Contacts

Tap the result to open it

Searching works for finding any app — and Aiden's always happy to help too!

Swipe down or tap the search icon, then type "Contacts" and tap the result to open it. This trick works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 3

Contacts

David

Susan

Tap the + to add someone new

Tap the plus (+) button to add someone new.

Step 3 of 3

New Contact

First name

Phone number

Fill in the name and number, then tap Save

Save

Type in their first name and phone number, then tap Save.

5. Share a Photo

Send a favorite picture to someone who'd love to see it.

Step 1 of 3

Search

Q Photos

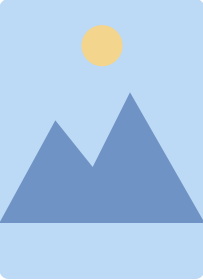

Photos

Swipe down or tap the search icon, then type "Photos" and tap the result to open your pictures. Searching works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 3

Tap the share icon — the box with the arrow

Open the photo you want to share, then tap the share icon — the little box with an arrow — at the bottom of the screen.

Step 3 of 3

Share with...

Messages

Email

Save

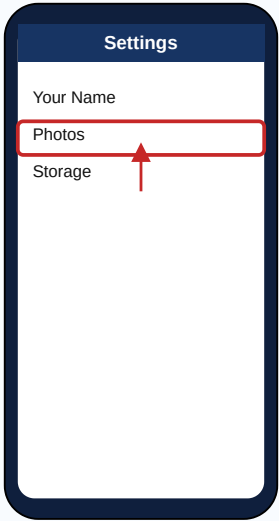

Choose Email or Messages to send the photo to

Choose Messages or Email, then pick who you want to send the photo to.

6. Back Up Your Photos

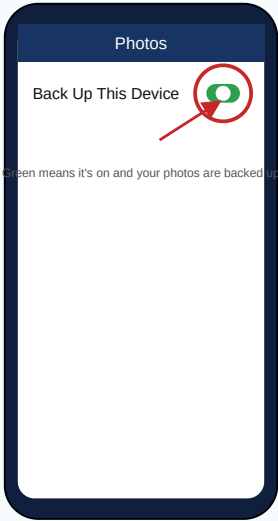

Keep your pictures safe, even if something happens to your phone.

Step 1 of 3

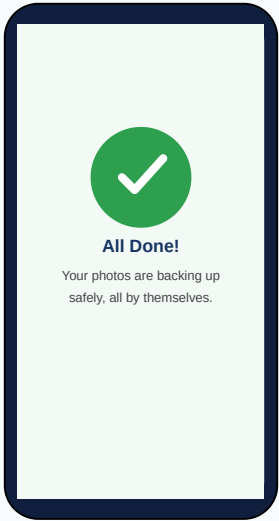

Open Settings, tap your name at the top, then tap Photos.

Step 2 of 3

Turn on Back Up This Device. Green means it's on.

Step 3 of 3

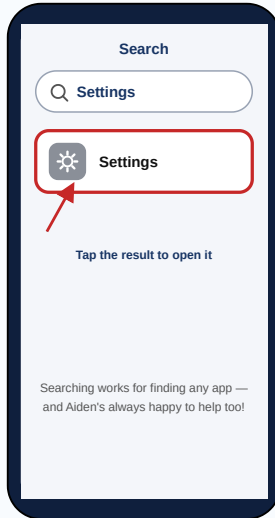

That's it — your photos will now back up safely on their own, even if something happens to your phone.

7. Make Text Bigger

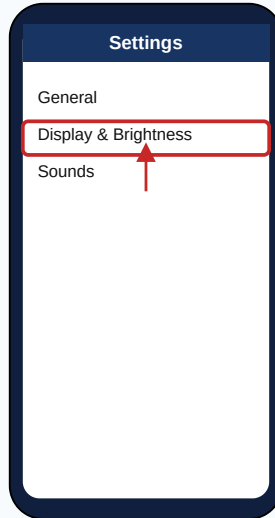

Make everything on your screen easier to read.

Step 1 of 3

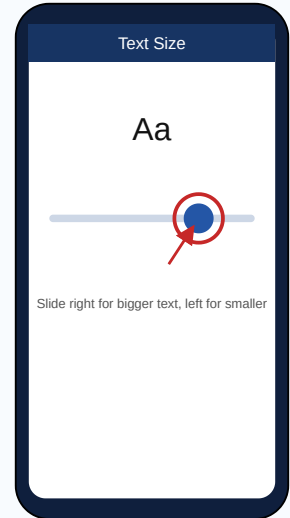

Swipe down or tap the search icon, then type "Settings" and tap the result to open it. Searching works for finding any app — and Aiden's always happy to help too!

Step 2 of 3

Tap General, then tap Display & Brightness.

Step 3 of 3

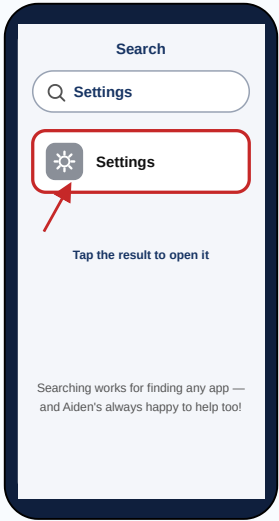

Tap Text Size, then slide it to the right to make everything on your screen bigger.

8. Connect to Wi-Fi

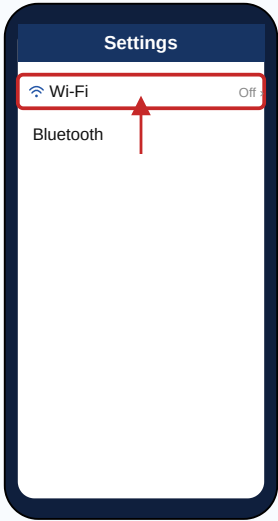

Get your device online at home.

Step 1 of 4

Swipe down or tap the search icon, then type "Settings" and tap the result to open it. Searching works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 4

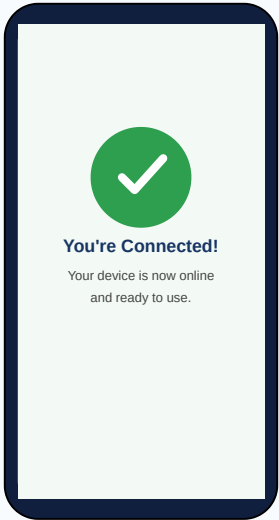

Tap Wi-Fi near the top of the list.

Step 3 of 4

Tap your home network's name, then type in the Wi-Fi password to connect.

Step 4 of 4

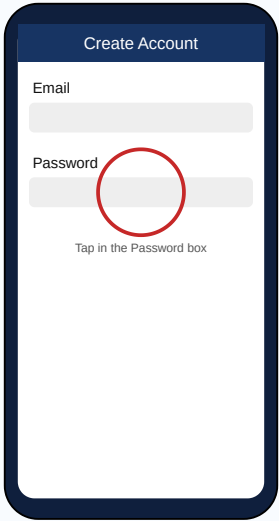

Once you're connected, you'll see a checkmark next to your network's name.

9. Create a Strong Password

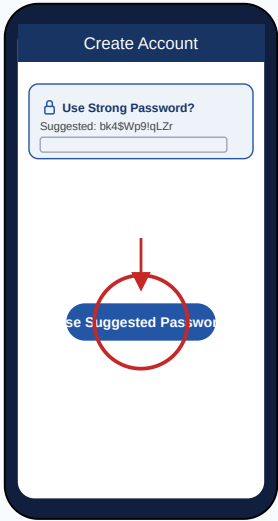

Let your phone create and remember a safe password for you.

Step 1 of 3

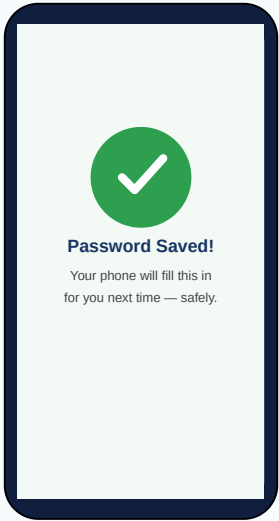

When a website or app asks you to create a password, you'll see a screen like this one.

Step 2 of 3

Look for "Use Strong Password?" and tap Use Suggested Password — no need to make one up yourself.

Step 3 of 3

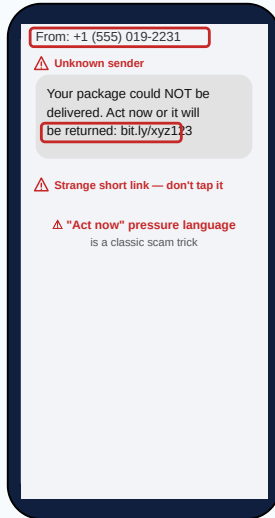

Your phone remembers this password for you, so you'll never have to.

10. Spot a Scam Text

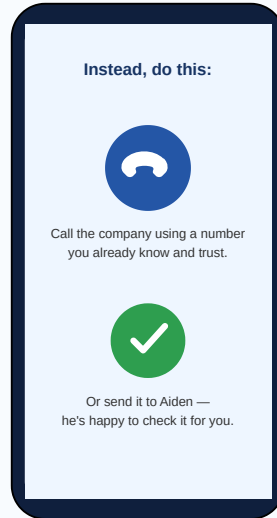

Learn to recognize a trick message — and know just what to do.

Step 1 of 2

Real companies never rush you or ask you to click a strange link. An unexpected message with urgent language or an odd link is usually a scam.

Step 2 of 2

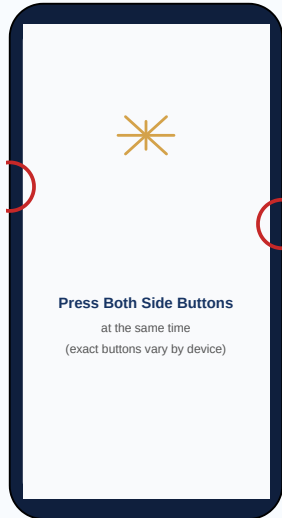

Don't tap the link. Instead, call the company using a number you already know and trust, or send it to Aiden and he'll happily check it for you.

11. Take a Screenshot and Share It

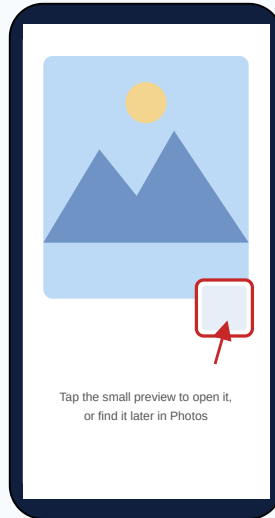

Capture what's on your screen and send it to someone in a text.

Step 1 of 3

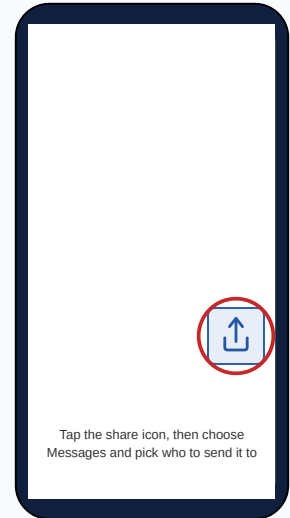

On most phones, press two buttons on the edges of the phone at the same time — often the side (power) button and the volume-up button. You'll see a quick flash and hear a click, which means it worked. This is slightly different on every device, so ask Aiden if yours looks different.

Step 2 of 3

Your screenshot is saved automatically — usually to your Photos app. Right after you take it, you may also see a small preview appear in the corner of your screen; tap it to open it right away.

Step 3 of 3

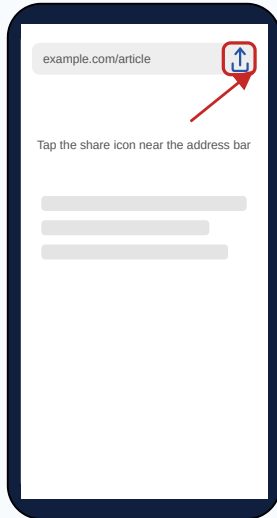

Open the screenshot, tap the share icon — the box with an arrow — then choose Messages and pick who you want to send it to.

12. Share a Link in a Text or Email

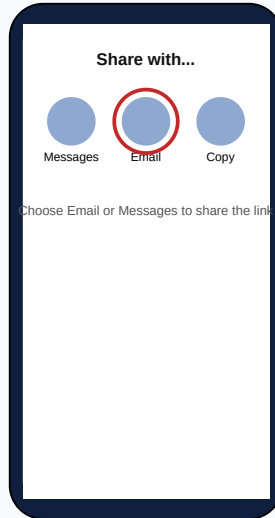

Send a webpage or article to someone else with just a couple of taps.

Step 1 of 3

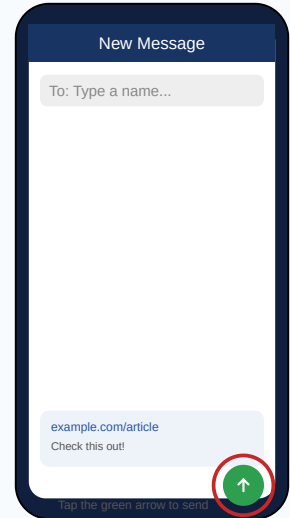

While looking at a webpage in your browser, look for the share icon — a small box with an arrow pointing up. It's usually near the address bar at the top, or along the bottom of the screen.

Step 2 of 3

Choose Messages or Email from the share menu, then pick who you want to send it to.

Step 3 of 3

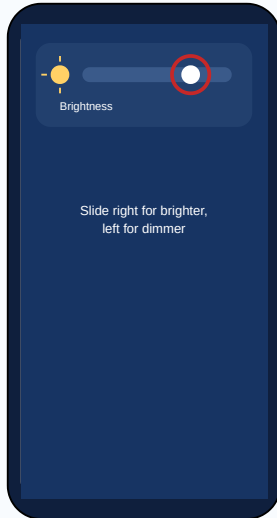

The link will appear in your message, ready to send. Pick the person, then tap the green arrow to send it.

13. Adjust Brightness and Sound

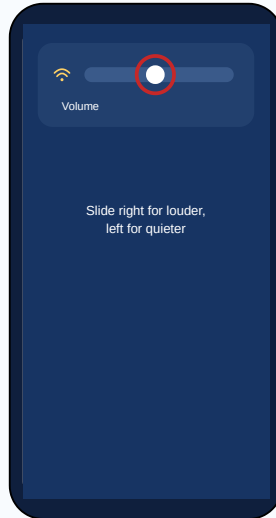

Make your screen easier to see and your phone easier to hear.

Step 1 of 3

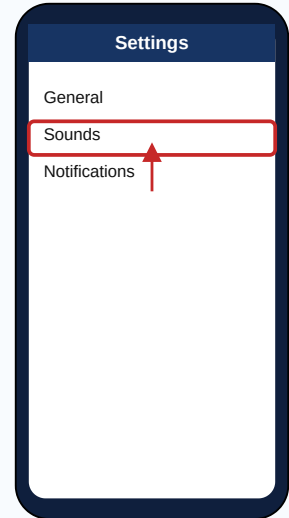

Swipe down from the top-right of your screen (or up from the bottom, depending on your device) to open quick controls, including a brightness slider shown with a sun icon.

Step 2 of 3

In that same panel, look for the volume slider — usually shown with a speaker icon — and slide it to make your phone louder or quieter.

Step 3 of 3

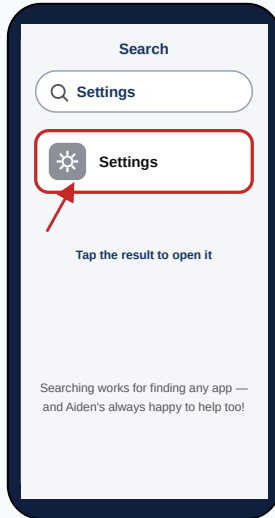

For more control over ringtones, alerts, and call volume, open Settings and tap Sounds.

14. Adjust Notifications

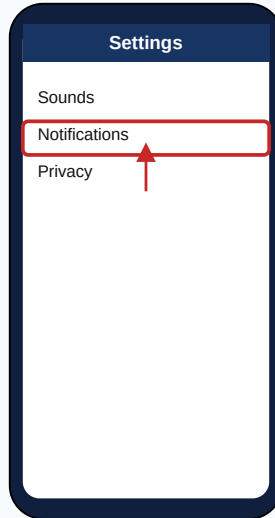

Choose which apps can send you alerts, and how loud or quiet they are.

Step 1 of 3

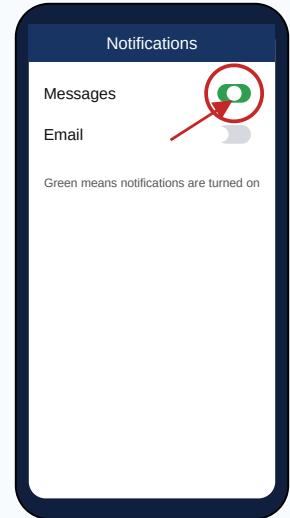

Swipe down or tap the search icon, then type "Settings" and tap the result to open it. Searching works for finding any app — and Aiden's always happy to help if you get stuck.

Step 2 of 3

Tap Notifications to see which apps are allowed to alert you.

Step 3 of 3

Tap an app's name, then turn its notifications on or off. Green means notifications are turned on for that app.
